

Marco Bulk Bag Racks are used to fill blast pots with abrasive packaged in bulk bags. Four rack designs are available for mounting directly in receiving collars located on top of a bulk pot or on a bulk bag rack stand to streamline the process of filling a blast pot. Utilizing a Bulk Bag Rack improves work site safety by eliminating the use of a lifting device to suspend the bag over the blast pot while filling. Using bulk bags can reduce overall abrasive costs and provide storage convenience on the work site. Typical applications include blast yards, offshore platforms, oil refineries, pipelines, and storage tanks.

## ENHANCED SAFETY

Securing a Marco Bulk Bag Rack to the top of your blast pot provides an alternative to using a lifting device to suspend a bulk bag of abrasives over your blast pot during the filling process.

## REDUCED COST

Using bulk bags abrasives reduces overall abrasive costs and provides a convenient storage option for abrasives at the work site.

## COMMITMENT TO QUALITY

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Marco products adhere to strict process controls as specified by Allredi's Quality and Engineering team.

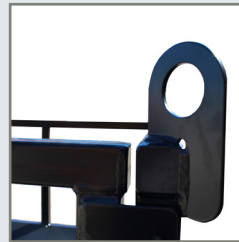

The Marco Heavy-Duty Bulk Bag Rack includes a swing gate for easier loading.

The tapered panels to improve abrasive flow while filling the blast pot.

The steep angle of the 90° cone bottom provides significantly improved abrasive flow versus a 60° cone bottom.

Equipped with four lifting lugs for moving the rack with a crane.

## KEY FEATURES:

- Four lifting eyes
- Four locking pins
- Retrofittable to most bulk pots
- Swing gate
- Fork pockets
- Optional funnel
- Empty weight: 708 lbs.
- Height: 71"
- Total Width: 60"
- Leg Width: 37" to 40" options

## OPTIONAL ACCESSORIES

### Blast Pot Moisture Separator

Blast Pot Moisture Separators remove excess moisture, oil, and other debris from compressed air before entering the blast pot.

### Blast Hose

Marco Blast Hose is available in standard lengths of 50, 100 and 400 feet, and custom lengths up to 200 feet.

### Blast Nozzles

A wide variety of blast nozzles are available to meet even the most challenging work site requirements.

### Blast Pot Lids Screens, & Funnel

Blast pot lids, screens, and funnels help keep damaging debris out of the blast pot.
