

Dust collector filter cartridges trap dust particles removed by a dust collector system from abrasive blasting. High-quality filter cartridges are critical for keeping a dust collector operating effectively to maintain proper air flow and visibility on the work site. Allredi offers dust collector filter cartridges that are high quality replacements for all major dust collector manufacturers.

INCREASED PRODUCTION

Dust Collector Filter Cartridges provide proper amount of media surface area and pleat spacing for effective dust surface loading during the suction cycle and excellent dust release during the cleaning cycle.

REDUCED DOWNTIME

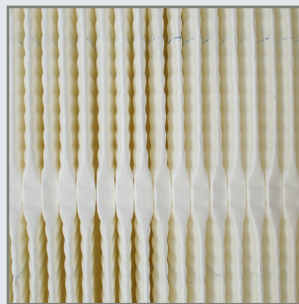

A galvanized, expanded metal sheath provides structural integrity and resists rust and corrosion, extending useful cartridge life.

COMMITMENT TO QUALITY

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Marco products adhere to strict process controls as specified by Allredi's Quality and Engineering team.

A wide variety of styles and configurations of cartridges are available, including round, flanged, or square cartridge caps.

The dimpled-pleat technology ensures consistent pleat spacing and effective release of dust during air pulse.

The expanded metal sheath provides structural integrity to the filter assembly. The expanded metal is made of galvanized steel to resist rust and corrosion.

KEY FEATURES:

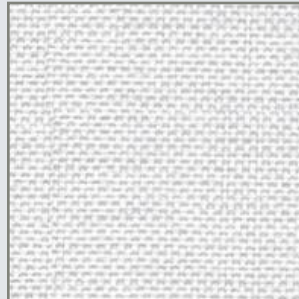

- Wide Variety of Styles and Configurations
- Dimpled-Pleat Technology
- Galvanized Expanded Metal Inner and Outer Cylinder

OPTIONAL ACCESSORIES

Ducting Hose

Available in 6" to 24" I.D. and 25' and 50' lengths.

Containment Tarps

Containment Tarps are available in 10', 20' and 40' lengths and a variety of material types.

Duct Hose Connectors & Clamps

Connectors and Clamps are available in a variety of sizes.
