

Vacuum Hose is ideal for use with industrial vacuums for quick clean-up of loose abrasives and debris on a job site. Vacuum Hose is composed of three layers. An abrasion-resistant polyurethane inner liner provides superior performance and durability. A rugged PVC helix provides strength and structural integrity to resist collapsing at full vacuum. An abrasion resistant and UV resistant cover protects the hose from the environment. Vacuum Hose is available in 1-1/2", 2", 2-1/2", 3", 4", 5", 6" and 8" inner diameters.

INCREASED PRODUCTION

Vacuum Hose has a durable polyurethane inner liner providing a smooth interior surface allowing loose abrasive to flow easily through the hose. The rugged PVC helix resists collapse at full vacuum and allows the hose to bend and flex around corners without kinking. These characteristics increase production rates on the job site.

REDUCED MAINTENANCE

The superior construction extends the working life of the Vacuum Hose. The durable polyurethane inner liner, rugged PVC helix, and abrasion-resistant cover provide superior longevity, reducing the frequency of repair and replacement.

COMMITMENT TO QUALITY

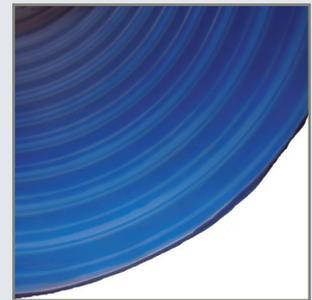

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Marco products adhere to strict process controls as specified by Allredi's Quality and Engineering team.

A rugged PVC helix resists collapse at full vacuum and allows the hose to bend and flex around corners without kinking.

Vacuum Hose Menders, manufactured of 1/8" thick steel, are sized to the inside diameter of the vacuum hose, providing a snug fit for joining two like sized sections of vacuum hose together or to quickly repair damaged sections of vacuum hose.

A durable polyurethane inner liner provides a smooth interior surface, which allows loose abrasive to flow easily through the hose. Superior abrasion resistance extends the working life of the Vacuum Hose.

KEY FEATURES:

- Temperature range of 0°F to 158°F
- Polyurethane inner liner for superior abrasion resistance
- Rugged PVC Helix provides strength and flexibility
- Available I.D.: 1-1/2", 2", 2-1/2", 3", 4", 5", 6", and 8"
- Available lengths: 25', 50', and 100'

OPTIONAL ACCESSORIES

Vacuum Hose Mender

The vacuum hose mender connects two lengths of vacuum hose with the same I.D.'s. Various size options are available.

Vacuum Hose Reducer

The vacuum hose reducer connects two industrial vacuum hoses with different I.D.'s to each other. Various size options are available.

Wye Adapter

The wye adapter connects two smaller vacuum hoses to a larger I.D. vacuum hose. Various size options are available.

Vacuums are Available for Purchase or Rent
