

10X ABRASIVES

New abrasive media

ALLREDI IS EXCITED TO ANNOUNCE OUR PARTNERSHIP WITH 10X ABRASIVES TO BRING AN INNOVATIVE NEW MEDIA TO THE SURFACE PREP INDUSTRY!

20/70

An all-purpose abrasive that works on any hard surface (from metal to concrete) to get rid of hard, thick, and challenging coatings. 10X will remove corrosion and coatings with low dust, to get an ideal profile for recoating.

40/70

Another all-purpose abrasive, 40/70 is ideal to tackle surfaces coated in corrosion, coatings & mill scale leaving a clean surface for recoating. Great for use in wet/vapor blasting machines!

10X
ENGINEERED
MATERIALS

10X BENEFITS:

- No ferrous contaminates
- Non-corroding finish
- Leaves an Ideal blasted finish on stainless steel
- Removes welding stains
- No free silica
- No beryllium
- Inorganic
- Ultra-low dust
- Virtually no embedment
- Low conductivity
- Adaptable to most substrates
- Low carbon footprint production process
- 100% made in USA
- Very efficient and productive on use with thicker coating applications
- Reduces flash rust corrosion (*No ferrous contaminates or conductive ion species*)

» *A study was done in which panels were blasted with garnet and 10X, then left outside for a rainy, 3-day period. The panel blasted with garnet showed significant rust while the panel blasted with 10X did not. 10X abrasives leave a truly clean surface with no embedment or residue to initiate corrosion.*
